

UK Type Examination Certificate CML 22UKEX2057X Issue 0**United Kingdom Conformity Assessment**

- 1 Product or Protective System Intended for use in Potentially Explosive Atmospheres UKSI 2016:1107 (as amended) – Schedule 3A, Part 1
- 2 Equipment **Stat-Gun**
- 3 Manufacturer **Static Solutions Ltd.**
- 4 Address **Addison House,
Stairfoot Business Park,
Stairfoot Way,
Barnsley S70 3PD, UK**
- 5 The equipment is specified in the description of this certificate and the documents to which it refers.
- 6 Eurofins E&E CML Limited, Newport Business Park, New Port Road, Ellesmere Port, CH65 4LZ, United Kingdom, Approved Body Number 2503, in accordance with Regulation 43 of the Equipment and Protective Systems Intended for Use in Potentially Explosive Atmospheres Regulations 2016, UKSI 2016:1107 (as amended), certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment intended for use in potentially explosive atmospheres given in Schedule 1 of the Regulations.

The examination and test results are recorded in the confidential reports listed in Section 12.
- 7 If an 'X' suffix appears after the certificate number, it indicates that the equipment is subject to specific conditions of use (affecting correct installation or safe use). These are specified in Section 14.
- 8 This UK Type Examination certificate relates only to the design and construction of the specified equipment. Further requirements of the Regulations apply to the manufacturing process and supply of the product. These are not covered by this certificate.
- 9 Compliance with the Essential Health and Safety Requirements, with the exception of those listed in the confidential report, has been demonstrated through compliance with the following documents:

EN IEC 60079-0:2018

EN 60079-11:2012

EN 60079-28:2015

- 10 The equipment shall be marked with the following:

Ex ia op is IIB T4 Ga

Ta = -20°C to +50°C

Ex ib op is IIB T4 Gb

Ta = -20°C to +50°C

CML 22UKEX2057X

11 Description

The Stat-gun is a handheld ioniser for removing static charge from surfaces prior to applying spray paint. It would typically be used in a spray booth within an automotive body shop. An encapsulated high voltage generator supplies, via high value resistors, two pins that are located on either side of an air outlet. This produces an ionising current that is used to generate ions on the target surface so that compressed air can blow off dust particles.

It is powered from an internal rechargeable battery and is designed to be charged in safe areas only, via connections on the rear of the gun. LEDs on top of the gun provide an indication of operation and of the battery status.

The equipment is available in versions suitable for areas requiring equipment protection level Ga or Gb.

The charging socket has the parameter:-

$U_m = 5.25V$ d.c.

12 Certificate history and evaluation reports

Issue	Date	Associated report	Notes
0	27 Jul 2022	R14919A/00	Issue of prime certificate

Note: Drawings that describe the equipment are listed in the Annex.

13 Conditions of Manufacture

The following conditions are required of the manufacturing process for compliance with the certification.

- Where the product incorporates certified parts or safety critical components, the manufacturer shall ensure that any changes to those parts or components do not affect the compliance of the certified product that is the subject of this certificate.

14 Specific Conditions of Use

The following conditions relate to safe installation and/or use of the equipment.

- The Stat-Gun is to be charged in safe areas only using a charger supplied by Static Solutions that is marked for use with the product

11 Description

The Pro Stat-gun is a handheld ioniser for removing static charge from surfaces prior to applying spray paint. It would typically be used in a spray booth within an automotive body shop. An encapsulated high voltage generator supplies, via high value resistors, two pins that are located either side of an air outlet. The ionising current generates ions at the output of the gun, that are then blown onto the target surface to remove the static charge.

It is powered from an internal rechargeable battery and is designed to be charged via a socket at the rear of the gun, only in a safe area. LED's either side of the charging socket provide indication of operation and battery status.

The Pro Stat-gun may only be charged using a charger supplied by Static Solutions that is marked for use with the Pro Stat-gun. The charging socket has the following parameter:

$$Um = 5.25 \text{ Vdc}$$

It has previously been certified under BAS 21UKEX0149X.
